

OPERATIVE CERTIFICATION · GHOST II

THIS CERTIFIES THAT

someone_anon_coder

SCAN TO VERIFY

has completed the **Ghost II** track in full, eighteen levels down a single CI/CD delivery pipeline that ends with a commit shipping itself to an entire fleet, and is hereby recognized as a **BreachLab Secrets Sprawl Operative**. The holder has demonstrated practical proficiency across build host privilege escalation, runtime identity pivots, credential access, cloud and cluster secrets, and supply chain compromise, and is field ready for offensive pipeline security engagements.

"Ghost taught you the box. Ghost II taught you the pipeline that builds a thousand of them. You do not break into their infrastructure anymore. You become the code it ships."

DEMONSTRATED COMPETENCIES

- Build host privilege escalation · setuid, ambient capabilities, elevation control
- Runtime identity pivots · SSH, systemd timers and services
- Credential access · secrets in files, journald, and vaults
- CI runner compromise · Docker config and registry credentials
- Cloud and cluster secrets · access keys and Kubernetes service tokens
- Supply chain compromise · pipeline execution and build time swaps
- Code signing subversion · admission policy bypass · fleet delivery

OFFICIAL SEAL

BreachLab Command

Operator certification authority

Issued 2026-09-02 · irrevocable
